WORK EXPERIENCE

One Machine Software   Sep 2022 - Jan 2023
Associate Software Engineer

mhealthCoach / Company Project
- The mHealthCoach project involves the development of health-related web applications.
- The main functionality centers around allowing users to create appointments with different companies and hospitals through a step-wise flow.
- The application features a step-wise flow for users to create appointments.

The Hexaa   Mar 2023 - Present
Javascript Engineer

Company Project

ClassTap
Nov 2024 - Present
Project Link

React JS, React Native, Node JS , MySQL, Express JS, AWS

- Classtap mobile app is a robust backend infrastructure built on Node.js and Express, coupled with MySQL for efficient data management. This powerful combination guarantees lightning-fast performance and reliability.
- I orchestrated the development of its backend infrastructure using the powerful MERN stack – harnessing MongoDB, Express.js, React.js, and Node.js. This robust foundation ensures seamless data management and scalability.

AlifCommerce Saas App
June 2023 - Oct 2023
Project Link

React, Vue3 , Nuxt, Express JS, Node JS, AWS, MongoDB, Meilisearch

- Alif-commerce is an E-commerce SaaS Web app Like CMS as well where user can create their store with custom domains and list their products.
- Leveraged technologies such as React for the Admin Panel frontend and Nuxt & Vue 3 for the SaaS App, Node Js, Express JS and MongoDB for backend in the development process, ensuring a modern and efficient infrastructure for AlifCommerce Web app
- Implemented a robust search and filter system using Meilisearch to facilitate users in finding the most suitable products based on their preferences

Echomir
March 2023 - June 2023
